DESCRIPTION

Special additive to be used in addition to water contained in the tanks of the automatic blanket washing systems.

Acqua+ prevents the formation of algae and fungi eliminating the bacterial charge.

PRINCIPLE CHARACTERISTICS

Acqua+ is a product formulated to contribute efficiently the cleaning of the blanket.

Acqua+, thanks to its special components, during the emulsion phase between solvent and water, prevents the formation of micro bacterium that, in contrary case, brings to the creation of residuals that may obstruct the blanket washing nozzles.

Acqua+ contains corrosion inhibitors.

ADVANTAGES/BENEFITS

1. Efficient against bacterial charge.
2. Improves the emulsion process between water and solvent.
3. Guarantees excellent cleaning of the blanket.
4. Avoids corrosion of the metallic parts.
5. **Reduced environmental impact**

INSTRUCTIONS FOR USE:

Dose **Acqua+** directly in the water tank in the maximum percentage of 5% .

ACQUA +

CHEMICAL-PHYSICAL CHARACTERISTICS

Appearance	Pale blue liquid
Odor	Mild characteristic
pH (as it is)	5.5 – 6.5
Boiling temperature	>100°C
Density	1,000 g/cm ³
Water soluble	Soluble
Solvent soluble	Not soluble

Indicated data are characteristic and typical of the product and do not constitute specifics.

PRECAUTIONS FOR USE AND STOCKING

Chemical product, for industrial use only.

Irritant.

It is recommended to use the personal protective equipment indicated in the MSDS, while manipulating the product, especially protective glasses and gloves as well as adequate clothing.
