DESCRIPTION

Anti-set-off powder of different particle sizes.

Anti Set Off Powder is formulated to cover the entire wide usage spectrum and the various modern dosage systems.

Anti Set Off Powder is usable on all the systems, both electrostatic and at air and furthermore, are adequate for printing of FOOD PACKAGING.

PRINCIPLE CHARACTERISTICS

Anti Set Off Powder is formulated to avoid the set-off in the pile.

Anti Set Off Powder, due to the always higher printing press speed, avoids the risk of set-off.

Anti Set Off Powders are both standard as well as coated powders, able to guarantee to the printer operational tranquillity with a minor consume.

Anti Set Off Powders interrupt the transpiration effect of the wet ink and eliminate the electrostatic charges.

Anti Set Off Powders ensure the usage coverage of all the paper weights.

ADVANTAGES/BENEFITS

1. Reduction of waste and of press stop
2. Printing quality guaranteed
3. Maintenance of the spraying nozzles in perfect state
4. Minor usage consume
5. Major press efficiency with minor operational costs
6. Low volatility and emission in environment
7. **Reduced environmental impact**

INSTRUCTIONS FOR USE:

Anti Set Off Powder has to be poured in containers of the dedicated dosage systems. The type and quantity of **Anti Set Off Powder** depends on the paper type and on the particularity of the handling.

ANTI-SET-OFF POWDER

CHEMICAL-PHYSICAL CHARACTERISTICS

Appearance		White powder
Odor		Mild characteristic
Micron	STANDARD	Paper
12		up to 170 gr
25		from 170 to 300 gr
43		Cardboard
Micron	COATED	Paper
12		up to 170 gr
20		from 170 to 300 gr
36		Cardboard

Indicated data are characteristic and typical of the product and do not constitute specifics.

PRECAUTIONS FOR USE AND STOCKING

Chemical product, for industrial use only.

It is recommended to use the personal protective equipment indicated in the MSDS, while manipulating the product, especially protective glasses and gloves as well as adequate clothing.
