## DESCRIPTION

**In Line Glue is a dispersion glue, solvent and plasticizers free.**

**In Line Glue** is suitable for lengthwise continuous and intermittent gluing.

## PRINCIPLE CHARACTERISTICS

**In Line Glue** is appropriate for use on paper suitable for gluing, used in web offset and in chalcography printing.

**In Line Glue** is fluid and is suitable for applications with spray or at contact.

For moistening of folding we recommend the use of the product called **GLUE SOFT**, to prevent the cracking of the folding itself.

## ADVANTAGES/BENEFITS

1. Fast application
2. Cost reduction
3. Easy to use
4. In-line finishing

## INSTRUCTIONS FOR USE:

Apply **In Line Glue** as it is through dosing systems present in the finishing area.

For removal of **In Line Glue** from the application system, use the product called **GLUE CLEANER**

# IN LINE GLUE

## **CHEMICAL-PHYSICAL CHARACTERISTICS**

Appearance	While liquid
Odor	Characteristic
pH (as it is)	4,7 – 4,9
Boiling temperature	> 100°C
Freezing temperature	< 5°C
Water soluble	Complete
Solvent soluble	Not soluble

**Indicated data are characteristic and typical of the product and do not constitute specifics.**

## **PRECAUTIONS FOR USE AND STOCKING**

*Chemical product, for industrial use only.*

**STOCK AT TEMPERATURES ABOVE 5°C.  
KEEP IN ORIGINAL PACKAGING.  
USE THE PRODUCT WITHIN SIX MONTHS FROM THE DELIVERY  
DATE.**
