DESCRIPTION
Product for protection and repelling of the ink on offset presses cylinders.

PRINCIPLE CHARACTERISTICS
No Ink is a specific product that avoids the fresh ink release on the offset printing presses impression cylinder.
No Ink, applied on purpose on the cylinder's surface, creates a grease-proof patina capable to avoid the fresh ink build-up on the prints.
No Ink does not damage the metal parts.

ADVANTAGES/BENEFITS

1. Drastic reduction of the time of cylinder cleaning
2. Cleaner printing and without smudges
3. Major productivity
4. Elimination of build-ups on printing cylinders
5. Easy to use
6. Medium cylinder life prolonged in time with reduction of maintenance costs
7. **Minor environmental impact**

INSTRUCTIONS FOR USE:
Pour **No Ink** on the cylinder that needs to be treated and then apply it equally with a dry cloth.

NO INK

CHEMICAL-PHYSICAL CHARACTERISTICS

Appearance	White cream
Odor	Characteristic
pH (as it is)	8-9
Boiling temperature	> 100°C
Density	0,970 – 0,990 g/cm ³
Water soluble	Partially soluble
Solvent soluble	Partially soluble

Indicated data are characteristic and typical of the product and do not constitute specifics.

PRECAUTIONS FOR USE AND STOCKING

Chemical product, for industrial use only.

Harmful if ingested.

It is recommended to use the personal protective equipment indicated in the MSDS, while manipulating the product, especially protective glasses and gloves as well as adequate clothing.
