## **DESCRIPTION**

**TNT is a woven non woven for automatic blanket cleaning systems.**

TNT has been specifically created for use in the Graphic Industry.

## **PRINCIPLE CHARACTERISTICS**

TNT is composed of cellulose and polyester fibers and of one binder.

TNT is a result of a very particular manufacturing that makes it unique and different from other products existing in the market.

TNT has an excellent water/solvent absorption and high mechanical resistance.

TNT has an excellent behavior in respect of a dry and wet loading break, of dry and wet elongation break.

TNT develops a high heath solidity on rubbing, an optimal absorbency capacity with a reasonable time.

TNT has been tested in accordance with the ISO regulations 9073.2, ISO 105X12 and WSP 160.1(05).

## **ADVANTAGES/BENEFITS**

1. Easy to use and to install
2. Perfect and fast removal of ink residuals
3. Does not leave any residuals on contact surfaces
4. Does not tear under normal using conditions
5. Does not loose color neither on dry nor on wet with turpentine, with trichloroethane, ethyleneglycol and acetone
6. **Reduced environmental impact**

## **INSTRUCTIONS FOR USE:**

TNT has to be used on automatic blanket cleaning devices.

# TNT

## **CHEMICAL-PHYSICAL CHARACTERISTICS**

Color	Light blue
Weight	75 gr/mq $\pm$ 10%
Gauge	0,35 mm $\pm$ 0,10
Composition	Cellulose, polyester and binder
Absorbing	$\geq$ 300%
Breaking load (daN)	L $\geq$ 9,5 ; T $\geq$ 6,5
Elongation (%)	L $\leq$ 60 ; T $\leq$ 90

**Indicated data are characteristic and typical of the product and do not constitute specifics.**

## **DEMONSTRATIVE SAMPLE OF THE CLOTH**
